

# Early Career Researchers' Bioenergy Symposium

21<sup>st</sup> and 22<sup>nd</sup> March 2013

CEH Lancaster will host a symposium for bioenergy research over 2 days in March 2013. The symposium intends to bring early career scientists to a forum where individual research can be considered and critiqued in a less formal environment.

Potential session titles for this conference are

- Biocrop physiology and genetics
- Greenhouse gas budgets and C/N cycles
- Biochar application to bioenergy plantations
- Systems modelling; Biogeochemical processes to crop growth
- Soil-plant interactions
- Impact of land use change
